Software Developer based in Calgary with 5+ years of Full Stack history, providing expertise in Cloud Infrastructure in both AWS and Azure. Experienced in AI-integrated development workflows across C#, .NET, TypeScript, JavaScript, Java, Node.js, SQL, and Hibernate environments within agile delivery environments.

Experience:

Software Developer – *Detection Technologies (Calgary)*

Sep 2023 – May 2023

- Worked in an Agile environment; completed stories in areas including React(JS) frontend, .NET (C#) backend, Microsoft SQL Server, and Azure DevOps. Contributed to story grooming sessions and pull request reviews, wrote and maintained existing Confluence documents to share knowledge of environment setup quirks, best coding practices and principles, maintenance of new features, etc.
- Led efforts to migrate existing projects from the Azure environment to an AWS EC2 instance with AWS S3 for storing location-sensitive data, creating a launchpad to drive international sales of Oil & Gas Software in areas with data sovereignty laws.
- Aided in security certification by moving plaintext secrets in .NET project's environment configurations to multiple Azure Key Vaults. This was vital to the procurement of our SOC 2 security certificate.
- Utilized Azure DevOps to create CI/CD pipelines to deploy a new UAT environment for projects, eliminating QA bottlenecks caused by concurrent feature development and streamlining the story to deployment pipeline.

Software Developer – *Nexix Inc. (Calgary)*

Apr 2021 – Apr 2023

- Led development of a pharmaceutical ordering platform and pharmacist-facing application built off Angular, Java/Hibernate, MariaDB, and Adobe Flex; managed development, deployment, and maintenance across the full stack.
- Took ownership over 20+ page acceptance criteria document standardized amongst all major pharmaceutical prescription dispensaries, streamlining customer convenience by allowing prescriptions to be transferred directly from doctors.

Software Developer (Internship) – *Pixineers Co. (Calgary)*

Jan 2018 – Apr 2021

- Developed healthcare related web apps diagnosing dry eyes, heart issues, and cosmetic changes built on Angular with a NodeJS backend.
- Resolves bugs with the frontend, implement new functionalities using official and Third-Party libraries/components (Angular Material, Bootstrap, Ng-Select Library, C3.js, etc.).

Skills:

Languages: JavaScript, Typescript, C#, Java, SQL

Frameworks, Libraries, DB: Angular 15+, React, Adobe Flex, .NET 8+/.NET Core, NodeJS, .NET Framework, Entity Framework Core, Hibernate, Microsoft SQL Server,

Cloud Infrastructure: AWS Cloud Services, Azure Cloud Services, Azure DevOps (CI/CD)

Additional: BitBucket, Jira, Git, Cursor 2.0, GitHub Copilot (GPT Model)

Education:

Computer Science Major 3.7 GPA

2015 - 2021

Bachelor of Science with Internship, University of Calgary
